Open Source Design

Bringing great design to Open Source Software

We are a community of designers and developers pushing more open design processes and improving the user experience and interface design of open source software.

We write [articles](#), run a [job board](#), put on [events](#), provide [resources](#), and present talks targeted at **developers and designers** interested in working and designing in Open Source.

Read more about [our goals](#) and [frequently asked questions](#). If you are interested in contributing, check out the [section on our site](#) for that. Also join our [organization on GitHub](#) and [our forum](#).
